

The RevGen Partners Business Intelligence Service Delivery Model

RevGen Partners builds consistent and efficient Business Intelligence infrastructures to support stakeholders and their various functions. From front line users to the executive team, users gain clarity through better data to improve operations, create accountability and drive profitability.

RevGen Partners designs each BI solution with these objectives top of mind:

- Design an actionable and powerful information architecture leveraging top technology and best practices
- Create a common business language to facilitate improved communications
- Build a robust platform to support internal functions including IT, Finance, Operations, Sales, Marketing, Supply Chain, Human Resources and others
- Establish process governance parameters to create cross-functional consistency and ensure data integrity
- Develop dashboards, reports and scorecards with seamless drill to/from detail
